## COMPREHENSIVE SOLUTION, OUTSTANDING ENERGY EFFICIENCY

Since 2011 we have been involved in industrial and residential air-conditioning technology, as well as the complex implementation of HVAC and energy solutions.

**We provide complete implementation of the following, with full infrastructure:**

- ✓ design and implementation of comprehensive air conditioning system solutions
- ✓ subsequent maintenance and servicing of existing systems,
- ✓ comprehensive implementation of remodelling projects with focus on energetics.

With the professional involvement of renewable energy sources, our energy solutions yield significant cost and energy efficiency.

### Custom solutions

Each member of our expert team has many years of experience in construction engineering, and when receiving a request for quote or an inquiry, they will assess the individual needs and offer a tailor-made solution.

## Trade

As the exclusive Hungarian distributor of **LENNOX and DECSA's state-of-the-art air conditioning technology products**, we provide our customers with the highest technological quality available. For years our company has been successfully installing Panasonic air conditioning products in residential and office settings.

»» Our engineering sales colleagues follow through the implementation process every step of the way, from initial contact to installation. After assessing the needs of our clients, our engineers design the most energy-efficient and most technologically optimal, complete HVAC system.

### Our customized solutions offer

- ✓ excellent air quality
- ✓ energy efficiency
- ✓ ease of use
- ✓ flexibility
- ✓ cost efficiency
- ✓ and excellent comfort

even to **supermarkets, restaurants, factories, industrial and commercial enterprises** with the highest professional demands.

## Energetics

Lenergy Magyarország Kft. offers high energy savings with a complex application of energy efficient technical innovations and customized engineering solutions. Also using renewable energy, our air conditioning systems allow for favourable Return on Investment times and environmentally friendly, cost-effective operation.

In many cases we can support air conditioning investments with EU funding, also using renewable energy with significant grants from public tenders. Our economical solutions are attractive for investment projects due to favourable Return on Investment times.

**Our company also helps in the tendering phase of your projects.**

## Service

We have a nationwide brand-independent service network, so after the design, sales and implementation phases we also carry out maintenance and repair of the machines as well as retro-fitting of existing systems for energy saving purposes.

In addition to the maintenance of the systems sold and implemented by Lenergy Magyarország Kft., our service network also perform service work for a number of companies and large corporations. In such cases, we prepare a quote based on a preliminary survey.

### Our customized solutions

- ✓ online, electronic work/on
- ✓ duty 365 days a year
- ✓ nationwide coverage
- ✓ 24-hour dispatch service

## LENNOX - AIR-CON CONTROL SOLUTIONS FOR THE FUTURE

Lennox products represent state-of-the-art industrial and commercial air conditioning technology. The high-precision, fine-tuned operation of various technologies, also employing renewable energy, allows for solutions with the highest energy and cost efficiency.

The energy efficiency of LENNOX products ensures quick return on investment in Air-Con control and air-flow technology.

### Industrial and commercial use

Our company offers end-to-end design, installation and servicing of LENNOX systems across various industrial and commercial sectors.

Thanks to our wide range of products, our air-conditioning and energy systems, be they at smaller wineries or restaurants to the needs of the largest shopping malls, factories, IT companies and office buildings, provide a durable and cost-effective solution.

#### Supermarket

Maximum comfort, intelligent control

#### Office building

Multi-layer, segmented air control

#### IT data centre

Stable operation, safe solutions

#### Hospitality

Maximum comfort in restaurants and cafes

#### Factories and warehouses

Sophisticated HVAC in factory spaces and warehouse buildings

#### Winery

Technology solutions for various stages of wine production

## DECSA - EVAPORATIVE COOLING

DECSA is now the industry leader in the development and manufacturing of equipment utilising water's hidden thermal properties (cooling towers, evaporative condensers).

The company's products meet the most complex project requirements, are easy to install and can be used in a wide range of industrial applications.

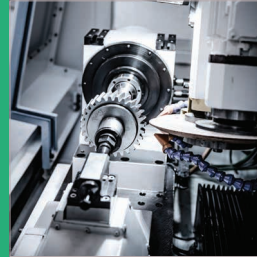

»» Thanks to energy-saving and highly energy-efficient equipment, the current product range of DECSA cooling towers, evaporative coolers and condensers is ideal for production lines, retail space and pharmaceutical and chemical manufacturers as well as commercial buildings.

AIR CONDITIONING

AUTOMOTIVE INDUSTRY

FOOD INDUSTRY

OFFICE BUILDINGS

## PANASONIC - AIR CONDITIONING AT HOME AND IN THE OFFICE

Panasonic's inverter equipment offers not only outstanding energy efficiency but also comfort, high air quality, and reliability in exchange for minimum space requirement.

Our company also sells and installs VRF systems, split AC equipment and heat pumps.

### Residential use

Panasonic Inverter devices can help you significantly reduce your apartment's Air-Con related energy consumption.

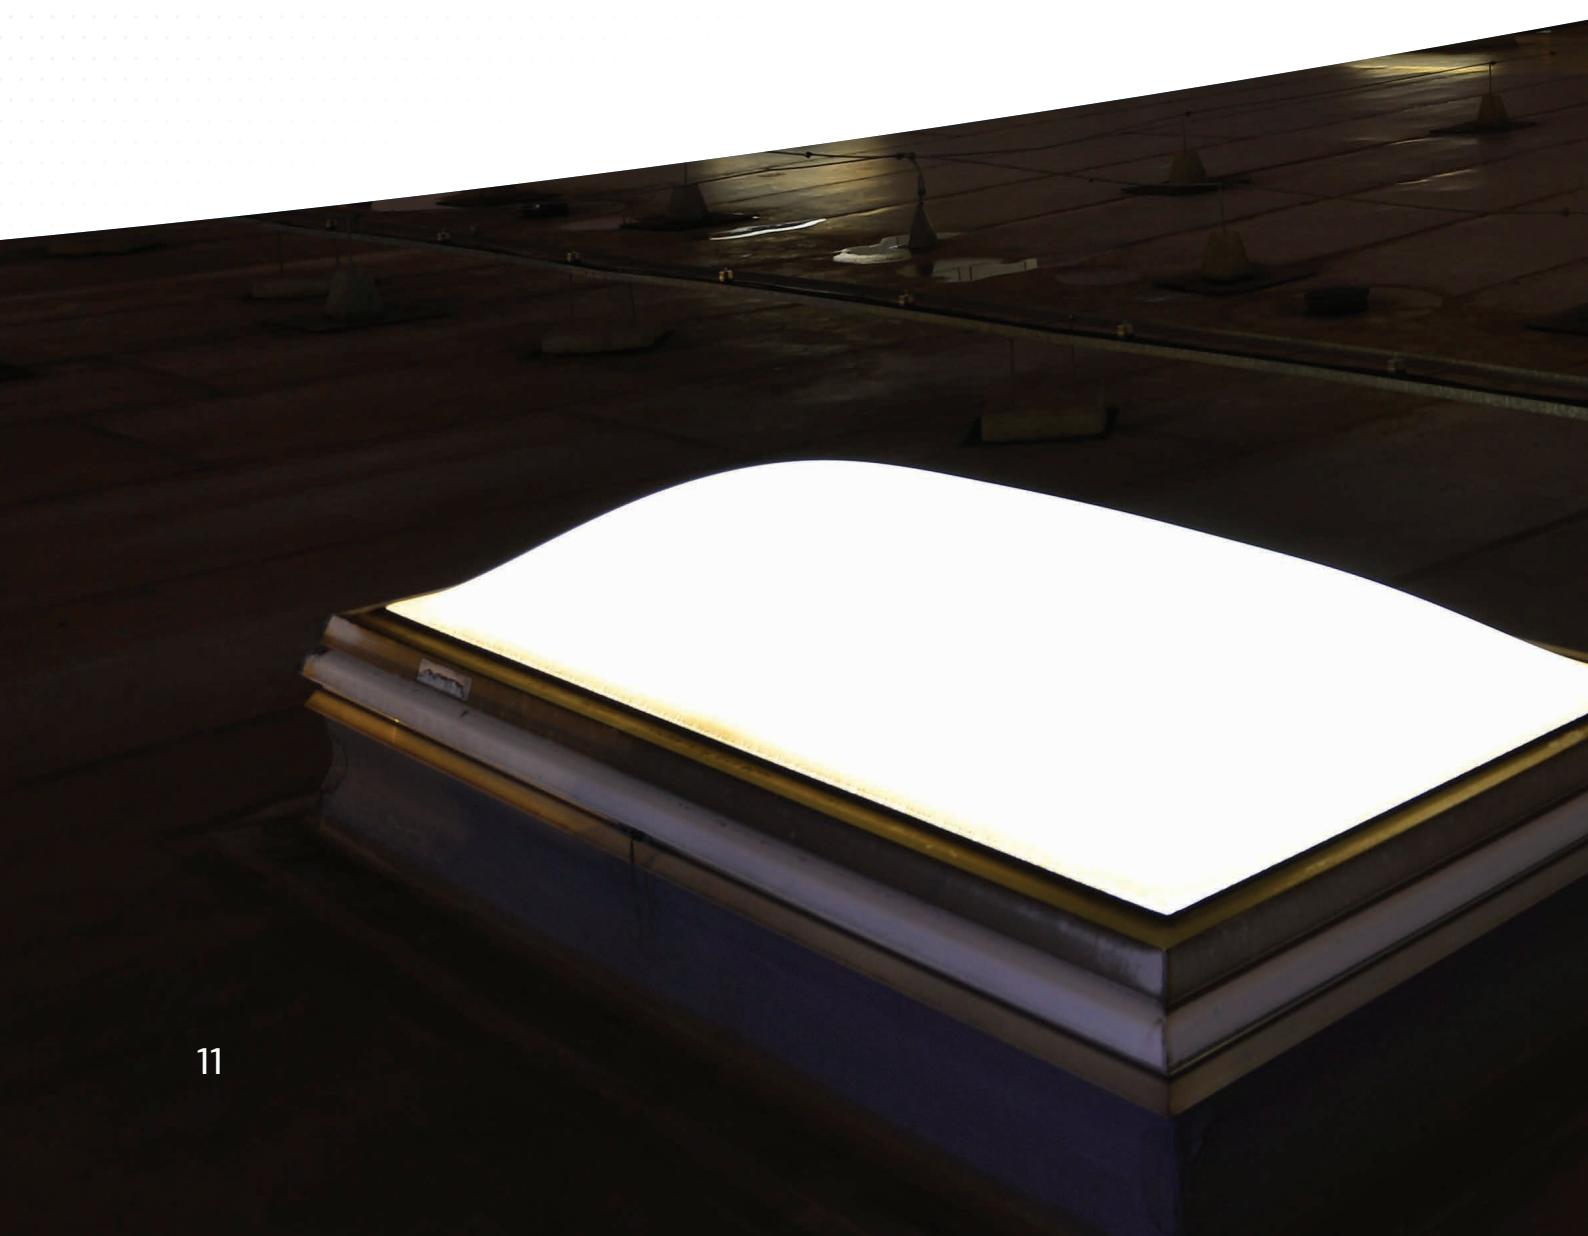

## LENNOX - ROOFTOP SYSTEMS

Operating costs can be lowered with high-efficiency, compact HVAC units.

LENNOX rooftop systems use all the necessary components of cooling, heating, ventilation and fresh air treatment, and have their automation and control within a single unit.

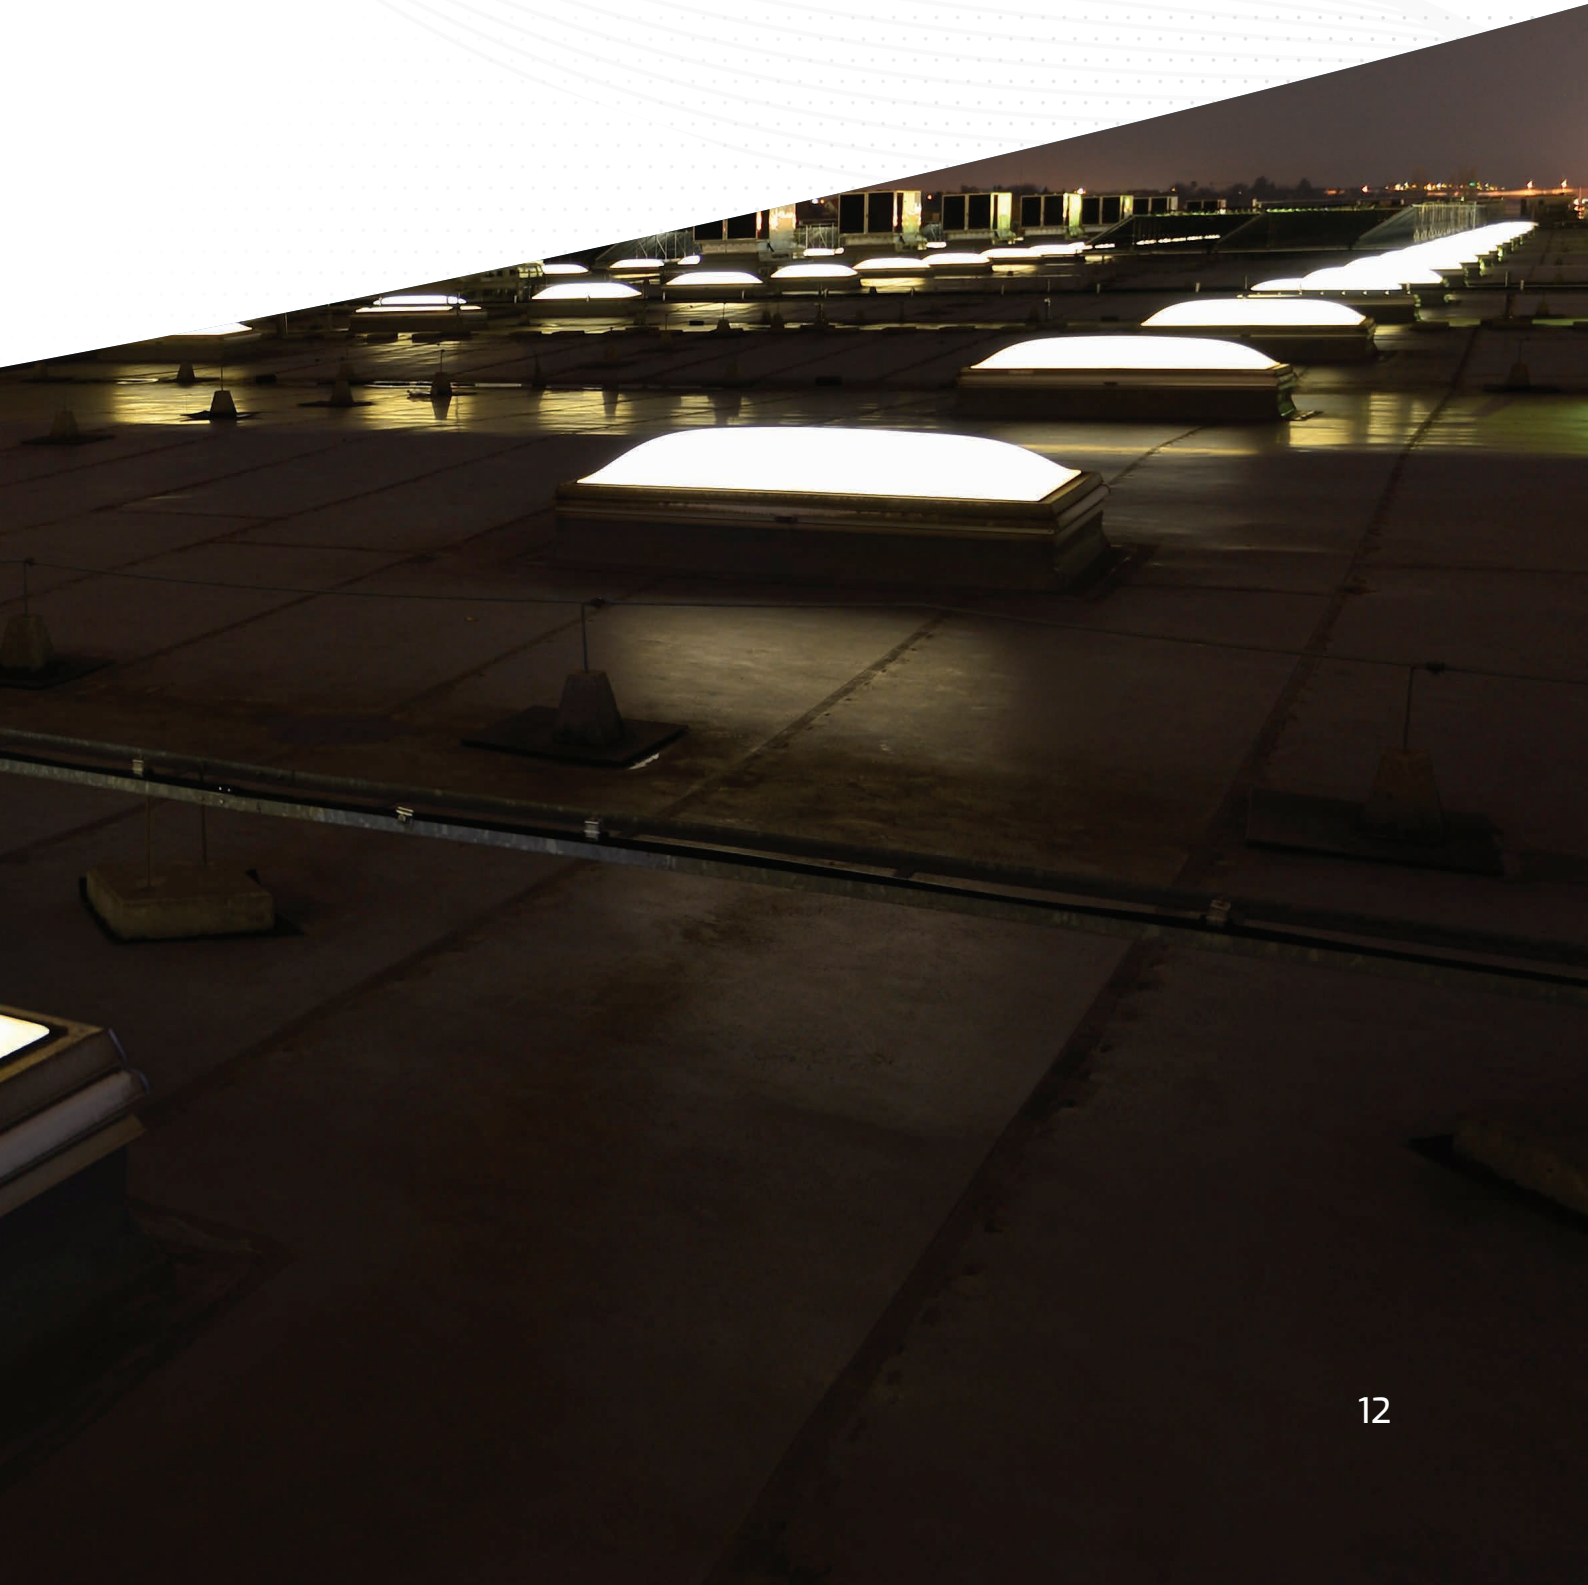

A single compact device can offer a cost-effective solution for the air-conditioning, ventilation and heating needs of the largest facilities.

»» The equipment can be installed even on rooftops, so there is no need for a separate machine room.

## Featured applications

- ▶ Small shops and retail stores
- ▶ Wholesale space and warehouses
- ▶ Grocery stores
- ▶ Restaurants, cafes and kitchens
- ▶ Industrial sites
- ▶ Food processing
- ▶ Factories

## ENVIRONMENTAL PROTECTION AND ART

We live in a picturesque country with breathtaking natural beauty and numerous outstanding highlights. At Lenergy Magyarország Kft. we believe that protecting our natural values and contributing to Hungarian nature conservation efforts are crucial tasks ahead of us.

### Enchanted Hungary

A nature photography initiative to introduce and promote Hungarian nature photography and our national parks.

### International nature film festival

During the festival, public attention is focused on Gödöllő, the value of nature here and how to protect it.

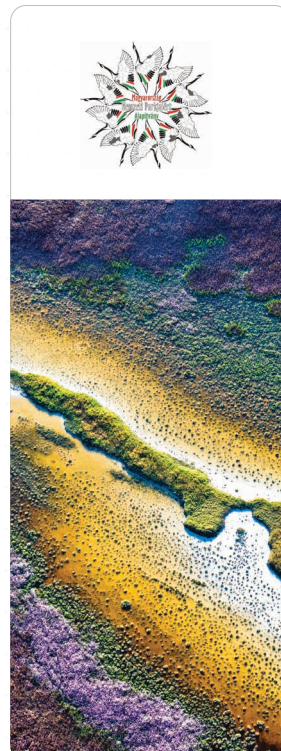

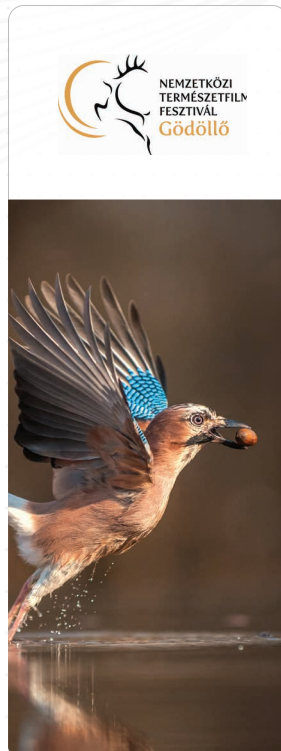

### Foundation for the National Parks of Hungary

Our goal is to draw attention to the wonderful features and breathtaking beauty of our national parks and the importance of conservation, with the help of the Magic Hungary photo competition.

### Nature Photographer of the Year

Presentation of the natural values, wonderful wildlife, landscapes and rare moments of nature across the Carpathian Basin's eco-sphere and around the World.

»» We also support, among other things, the work of Bence Máté, Csaba Daróczy and Ádám Gó, as well as the development of the Fajbook portal and the running of certain sports associations.

## FAJBOOK - A CONTEST TO LEARN MORE ABOUT ANIMALS SHARING OUR ENVIRONMENT

Collect species snaps!

Join the competition!

Win valuable prizes!

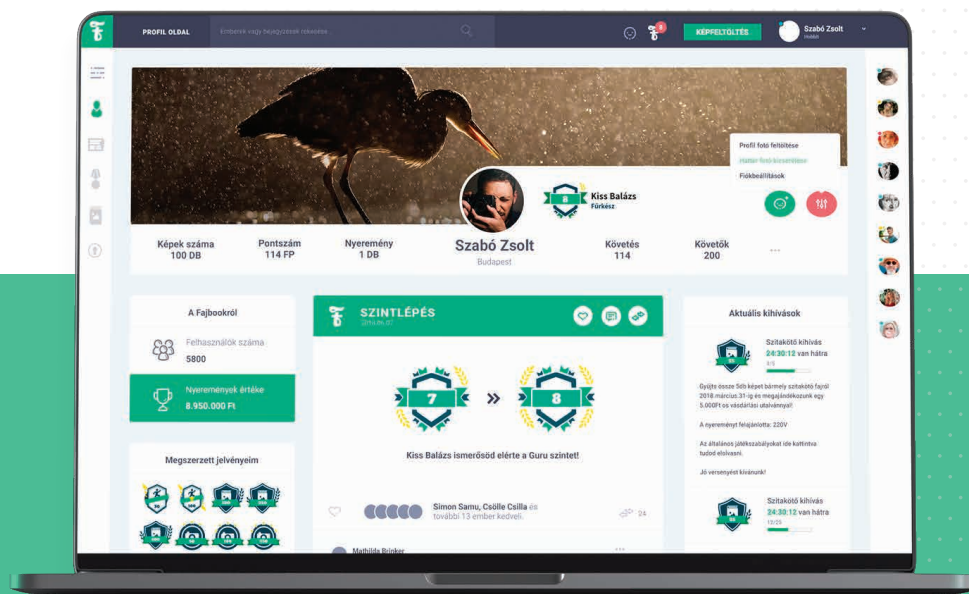

Fajbook is a website where you can enter a photo competition about different animal species in Hungary. It is not the quality of the photos that matters - as long as we can recognise the animal - just collect as many as possible.

The total value of the contest's prizes will be HUF 5,000,000 per year.

Upload your own photos of Hungarian species to your personal list of species. If you don't know what kind of animal you photographed, we'll help you identify them. We'd like to encourage you to get to know the rich fauna of your local environment.
